Dear Reader of this Testimony,

## PERMAROOFING

I have spent three hours watching and photographing Permaroofing working on the set of 'Cowboy Builders' fixing some badly fitted roofing.

They have a really good banter between them, but all the time doing a professional job (as you will see if you tune in to the next episode).

Firestone rubber roofing, what a concept. A single ply membrane that will cover a roof in one sheet.

Their patented extrusions that join with other roofing edges and materials are amazing to see fitted.

Check out the photos we took, especially of the snap lock drip tray into the guttering. Spend a bit more and get the job done once, roofs have been known to last 50 years with Firestone rubber (versus 8 to 10 years for a felt roof, as long as nobody treads on it).

Your sincerely,

**Gary Guillon** Director
