SEVEN COMMENDATIONS

During 2007 and into 2008, Mary and I have carried through a long-considered extension to the west flank of the house. The grand plan was to move the toilet in order to create cloak hanging space, add Utility and Wet Room facilities. These works involved a number of members of BNI Pioneer Chapter, of whom the current members are - in alphabetical order:

Keith Briscall, from Finesse Windows first came to apply his expertise and advice on requirements for windows and doors, ensuring that an excellent job was done by the works staff

Steve Broom, as second-fix carpenter fitted the frame and new multi-panel glazed door into the extension and changed two other doors in the hallway at the same time.

Dave Cantlon with Scott, from Aquafix who first dealt with tiling of walls and floor in the extension followed by plumbing.

At a later date, as a separate task, **Dave** and Scott came back to tile the kitchen floor

Mark Horner, as Architect, taking over mid-term from Ian Wilkins, completed a difficult transition and ongoing intervention with the Planning Authority.

Andy Percival, with Jackie, from AP Decorators, came recently to replaster walls in the old toilet area and make good a doorway which ad required insert of a lintel.

Bob Stretton, as Permaroofing, who provided and fitted the EDPM roof covering, having first checked the fall levels of the new roof, as fitted by the first-fix carpenters, and find this wanting, deferred action until consultation involving Mark had been carried through..

Without the skills, inter-action and professionalism of these Members the job would not have been completed as now finished and I am very grateful for all the care and attention exhibited by these good friends.

Thank you !

Howard Cooke
