

Mark Horner's Services

I could not recommend Mark Horner's services highly enough. We gave Mark a brief, which was very strict (yet naive in its possibilities) for what we wanted in our extension. After visiting us, a few days later we received Marks proposed ideas and plans and we could not have been more surprised and excited about what Mark had produced. He gave us everything we wanted and pushed the boundaries (literally) beyond what we thought were possible.

On submission of the plans, I went along to the Staplehurst Parish Council meeting, who are renowned for being very strict in approving developments to historic properties, to see the outcome. They said, and I quote:

"Its such a breath of fresh air to see such well thought out and professional plans, which are sympathetic to the historic nature on the building and tie in with the surrounding properties".

Staplehurst gave a unanimous recommendation to the Maidstone Council that the development should go ahead, and for this, I cannot thank Mark enough.

Our property was built in 1755, and Marks ideas, have not only used new technologies to meet current regulations, but also kept everything in keeping with the nature of the property such as Cast Iron staircases and Oak beamed Mezzanines.

The whole process has been such a pleasure and Marks friendly attitude and professionalism is second to none.
