Dear Tony

I write to thank you for the neat work carried out at Grove Green Community Hall. There were two area in the car park that originally contained flower beds. After some years, and because hall users sometimes parked partially on the flower beds, we removed the flower beds and had the two areas concreted. This allowed more room for car parking.

However the concrete was starting to break up so you were asked to quote to replace. We opted for the more expensive block paving. The work was carried out promptly and you found that the depth of concrete which you were removing was totally inadequate for the weight of vehicles. I understand you put a layer of type one road stone to create a solid base and the block paving on top. My committee are pleased with the result and thank you for the work.

Yours sincerely

Monty Knight-Olds
Chairman - Grove Green Community Association
